

POSITION: Inventory Control Analyst - Aviation

DEPARTMENT: Inventory & Logistics

LOCATION: Miami, FL USA

Company Description:

Associated Energy Group, LLC (AEG Fuels) is a global aviation fuels and services supply chain management company. The company's core business is the marketing and financing of fuel supply and logistics solutions for the world's largest airlines, militaries and corporate operators.

AEG Fuels serves its clients through a network of longstanding relationships with subcontracted parties around the world. Customers are afforded the benefits of negotiated fuel and throughput pricing based on AEG Fuel's aggregate volume within a network of over 2,700 airports as well as the company's specialized expertise in delivering products safely and on-time.

AEG Fuels is dedicated to providing comprehensive support and unparalleled 24/7 service around the world. 17 different nationalities are represented on AEG's team and with offices in Miami, Houston, Tahoe, London, Dubai, and Singapore the company combines a global presence with a local touch.

AEG Core Values:

- Excellence & Teamwork
- Entrepreneurship & Innovation
- Respect & Trust
- Always Do What's Right

Position Description:

The Inventory Control Analyst will be responsible for the organization and optimization of physical jet fuel logistics and scheduling. The primary role of the Inventory Control Analyst will be to facilitate the transfer of refined products via various modes of transportation including truck and pipeline transfers into inventories, FBOs and end users across the network. This role will interface with a variety of internal and external contacts and will be responsible for nominating, scheduling and tracking the movement of fuel from start to finish. This role will help facilitating the flow of information in support of the overall procure to pay trade cycle and requires coordination between the Sales, Credit, Tax, Dispatch, Financial Operations and Accounting teams. The Inventory Control Analyst will participate in decision making processes to help ensure that the company's profitability and growth strategies are optimally designed and accurately monitored. The position will be key in the development and deployment of tactics that grow the business, reduce risk and improve margins.

Required Skills and Experience:

- Fuel Operations, Logistics & Scheduling: coordinate the scheduling of fuel deliveries and pipeline movements across the network. Develop and maintain processes to track and report scheduling activities.
- Inventory Management: continually manage inventories to effectively forecast and ensure the scheduling of fuel deliveries into inventories is optimized and ratable.
- Business and relationship development with key operations and logistics providers: act as primary interface with FBOs, trucking companies, suppliers and other service providers.
- Critical thinking and analysis of delivery requirements: Determine the lowest cost method of reliably supplying fuel. Customer demand projections are received monthly and this information must be utilized to make strategic decisions regarding how to optimize fuel deliveries.
- Finance and Accounting: Understanding pricing methodologies and providers (Platts, Arugs, Opis) with the ability to review transactions to ensure proper contract terms have been met.

Recommended Experience:

- 2-5 years of experience in the fuel supply industry with a focus on the U.S. marketplace and particularly within the jet fuel aviation space
- The ideal candidate will possess strong logistics industry contacts across all forms of distribution, as well as proficiency in the jet fuel space
- 1-2 years of refined scheduling experience preferred (bulk truckloads, pipeline transfers)
- Strong organization and planning skills with attention to detail
- Proficient in Excel, along with skilled ability in Microsoft Office software
- Interest in Data Analytics with the ability produce useful insights from various data sources
- Inventory management and strategic supply skills
- Demonstrable record of success and achievement in the areas of supply, distribution and logistics
- Strong communication and networking skills
- Initiative, self-motivation, attention to detail and ability to work well within a team environment
- Ability to work in a very fast-paced environment and manage high levels of stress
- Bachelor's degree required
